

The Complete Tospovirus Resource Page! - Currently recognized tospoviruses

[note: these are reported with each new publication - names may not be proposed only]

Home Page	Tospovirus	Thrips Vector
Host List ©	CaCV = Capsicum chlorosis virus	<i>Ceratothripoides claratris</i>
Tospovirus Life Cycle	CCSV* = Calla Lily Chlorotic Spot Virus**	Thrips palmi
Monitoring for tospos	CSNV = Chrysanthemum stem necrosis virus	<i>F. occidentalis, F. schultzei</i>
Research Programs	GRSV = Groundnut ringspot virus	<i>F. occidentalis, F. schultzei, F. intonsa, F. gemina</i>
Tospovirus 'species'	INSV = Impatiens necrotic spot virus	<i>F. occidentalis, F. schultzei, F. intonsa</i>
Plant Taxonomy	IYSV = Iris yellow spot virus	<i>T. tabaci</i>
Background information	MYSV = Melon yellow spot virus	<i>T. palmi</i>
Related Links	PBNV = Peanut bud necrosis virus	<i>Scirtothrips dorsalis</i>
	PCFV = Peanut chlorotic fan virus	<i>S. dorsalis</i>
	PYSV = Peanut yellow spot virus	<i>S. dorsalis</i>
	PSMV = (Physalis severe mottle virus) = an isolate of MYSV	unknown
	TCSV = Tomato chlorotic spot virus	<i>F. occidentalis, F. schultzei</i>
	TSWV = Tomato spotted wilt tospovirus	<i>F. occidentalis, F. schultzei, F. intonsa, F. fusca, F. bispinosa, Thrips tabaci, T. setosus, F. gemina</i>
	TYFRV* = Tomato yellow fruit ring virus (=ToVV, Tomato Varamin virus)	<i>T. tabaci, Microcephallothrips abdominalis (?)</i>
	TYRV* = Tomato yellow ring virus	thrips noted but not identified
	WBNV = Watermelon bud necrosis virus	<i>T. palmi</i>
	WSMoV = Watermelon silver mottle virus	<i>T. palmi</i>
	ZLCV = Zucchini lethal chlorosis tospovirus	<i>F. zucchini</i>
