

## Analytic Hierarchy Process (AHP) Prioritized Pest List FY 2013

<b>Overview</b>	<p>The Analytic Hierarchy Process (AHP) Prioritized Pest List for 2013 is a ranked list of pests that are expected to cause damage to agricultural and/or natural resources if introduced into the United States. The prioritized pest list includes arthropods, mollusks, pathogens, nematodes, and weeds. <b>The 2013 List is the same as the 2012 List, except that <i>Planococcus minor</i> was removed. <i>Planococcus minor</i> was de-regulated in April 2012; therefore, it was removed from the list. All of the ranks of the pests remain the same.</b></p> <p>Subject matter experts in biology and economics evaluated each pest against a weighted set of criteria addressing <i>environmental impact</i> and <i>economic impact</i>. By combining the extent to which a pest fulfilled the set of criteria (determined by subject matter experts) with the criteria weights (determined by decision makers representing the CAPS community), each pest received a score. The result is the prioritized pest list shown on the worksheets <i>AHP PPL Rank by Taxon and AHP PPL by Rank</i>. The full set of criteria is shown on the worksheet <i>AHP Criteria</i>.</p>
<b>Pest List Constraints</b>	<p>To be included in the AHP Prioritized Pest List, a pest:</p> <ul style="list-style-type: none"><li>- Cannot be established in the conterminous United States (even if the distribution is limited)</li><li>- Cannot be considered non-reportable by PPQ</li><li>- Cannot be a program pest with funding for national survey</li></ul>

## Analytic Hierarchy Process Model Criteria

Strategic Objective:	
ENVIRONMENTAL IMPACT	Human health Health of native flora and fauna Health of livestock and pets Health of plants with aesthetic value
ECONOMIC IMPACT	Foreign trade Production costs and domestic trade Public costs
IMPACT TO CAPS PROGRAM*	Survey feasibility Identification feasibility

\*This set of criteria was not used to create **this version of the** AHP Prioritized Pest List. This information is now reflected within the CAPS-Approved Methods page available at [http://caps.ceris.purdue.edu/caps\\_methods/2013](http://caps.ceris.purdue.edu/caps_methods/2013).
