

I. Commodity Pest Lists

Exotic Woodboring & Bark Beetles

Removed:

These pests are no longer targets in the Exotic Wood Borer/Bark Beetle National Survey Guidelines. The pests will be added to the Additional Pests of Concern List.

- *Hylurgops palliatus* (Lesser spruce shoot beetle)
- *Pityophthorus juglandis* (Walnut twig beetle)
- *Sirex noctilio* (Sirex woodwasp)

Other:

The scientific name of *Agrilus coxalis*/*Agrilus coxalis auroguttatus* (Goldspotted oak borer) was changed to *Agrilus auroguttatus*.

Grape*

Removed:

- *Copitarsia* spp. (Noctuid moth)

Oak

Removed:

- *Curculio elephas* (Chestnut weevil)

Pine

Removed:

- *Dendrolimus superans* (Sakhalin silk moth) (until survey method is available)
- *Diprion pini* (Large pine sawfly) (until survey method is available)
- *Urocerus gigas gigas* (Giant woodwasp)

Small Grains

Removed:

- *Copitarsia* spp. (Noctuid moth)

Stone Fruit*

Removed:

- *Leucoptera malifoliella* (Pear Leaf Blister Moth) (until trap improvements and identification support tools can be developed)

*The Grape and Stone Fruit Commodity-based surveys are available only as Farm Bill-funded surveys (not CAPS) for 2013.

II. Pests of Economic and Environmental Importance (Derived from the AHP List)

Pests Removed:

Listed on the 2012 AHP list. Pest is now non-reportable.

- *Planococcus minor* (Passionvine mealybug)

III. Additional Pests of Concern

Pests Added:

Previously listed in the Exotic Wood Borer/Bark Beetle National Survey Guidelines:

- *Hylurgops palliatus* (Lesser spruce shoot beetle)
- *Pityophthorus juglandis* (Walnut twig beetle)
- *Sirex noctilio* (Sirex woodwasp)

NPAG Recommendation:

- *Cylindrocladium pseudonaviculatum* (*Calonectria pseudonaviculata*) (Boxwood blight; Leaf and stem blight). *Cylindrocladium pseudonaviculatum* (No common name) was already listed on the Additional Pests of Concern with the source: “Lower ranking pests from the 2012 AHP List.” With the recent finds, the source was changed from “Lower ranking pests from the 2012 AHP List” to “NPAG Recommendation.” The additional scientific name and common names have been added.
- *Neoleucinodes elegantalis* (Tomato fruit borer)
- *Tecia solanivora* (Guatemalan potato moth)

National Plant Board

- *Acrolepiopsis assectella* (Leek moth)

Previously listed on the 2012 AHP List:

- *Planococcus minor* (Passionvine mealybug)

Pests Removed:

This pest is strictly a fungal disease of citrus. CAPS no longer funds citrus surveys.

- *Phoma tracheiphila* (Mal secco)

There are no diagnostic screening methods for this group of pests.

- Torradovirus (ToTV, ToANV, ToMarV)
